

Moving and Learning Report - District 191

The Moving and Learning training is structured to provide teachers with the knowledge and skills to help their students utilize its techniques in the classroom. Through funding provided by the Statewide Health Improvement Partnership grant by the Minnesota Department of Health, Dakota County sponsored trainings conducted by 1000 Petals¹ at several local schools. The trainings consisted of a two-hour training at an in-service day and some staff also received a residency, where further guidance and in-class support was offered. The following results highlight feedback provided approximately 3 school-months after the training was provided.

District 191 Results

In District 191, 210 staff were trained with 78 providing feedback (40%) 3 months after the initial training. When asked how often they are using Moving and Learning techniques, responses were:

- 29% every day
- 24% 2-4 times a week
- 15% once a week
- 26% less than one a week
- 6% never

Quotes from teachers:

"The kids enjoy them and ask for them if they feel like they need to focus."

"Students are able to stay in class more and deescalate independently."

"More frequently practicing self-care throughout the day as an educator. Having mindful movement built into the day allows me to be more calm along with my students."

Further, staff were asked how Moving and Learning has helped their students. Figure 1 highlights responses from staff on a 4-point scale who "agreed" or "strongly agreed" with each category.

Dakota County Results

Across the County, 400+ staff have been trained. Immediately following the training, almost all agreed or strongly agreed they would use what they learned (99.8%). Figure 2 highlights those implementing the techniques 3 months following the training. Moving and Learning is encouraging more movement during the school day.
